🌟 Advanced Projects — Coming Soon!

Hello Innovator 🔧✨

The **Advanced Projects** are the next big leap in your journey! These will combine multiple components, sensors, and logic to create **real-world applications** — perfect for those ready to go beyond the basics.

Before that, make sure you complete the Basic & Intermediate Projects to build a strong foundation! 🚀

🗓️ Release Plan:

- We continuously work on adding new and valuable projects to enhance your learning experience. If we identify interesting and useful projects that can truly improve your learning journey, those Intermediate Projects will be released in the last week of each financial quarter.
- We recommend checking for updates in the **first week of April, July, October, and January** to access the latest addition.

✨ Bonus for You:

Every new project will be **free for our existing users**.
Simply use the **same link** you used to download this content, and you'll always have the latest version.

Thanks for being part of our learning community 💙
